HEAT PUMP

SOFTSOUND™ SX 2300

HEAT PUMP

The intelligent choice in comfort.

Come home to quiet.

Because the Comfortmaker® SoftSound™ SX 2300 runs so smoothly, it's no surprise that this heat pump is equally quiet and efficient. Even the two-speed fan motor reduces noise by running mostly on low speed. Every component is designed to make your comfort level go up and your monthly heating and cooling bills go down. Durable materials and other weather-guard features add long life. You—and the planet—also get the advantages of the environmentally sound refrigerant R410A.

Enjoy long-term comfort.

The SoftSound SX 2300 protects your investment with a filter dryer for moisture removal, a solidly constructed cabinet with a sturdy corner post, and finishes with appliance-grade paint.

Get warranty security.

Every Comfortmaker unit is backed by exceptional warranties, including our No Hassle Replacement™ limited warranty*, which gives you a replacement unit if the compressor or outdoor coil should fail within the first year. You also get up to a 10 year[§] parts and compressor limited warranty.* And don't forget to ask your dealer about HELP® extended service agreements for additional worry-free protection for parts and labor coverage.

*See published warranty for complete details. To learn more about all of these limited warranties, including the No Hassle Replacement limited warranty, go to Comfortmaker.com.

§Subject to conditions. Ten year warranty requires timely registration. See detailed additional information on back page and Warranty Certificate at Comfortmaker.com for complete details.

Standard features that set high standards.

Quiet

The Copeland Scroll® compressor operates without noisy pistons and comes with a sound blanket to reduce compressor sound levels.

Save on energy.

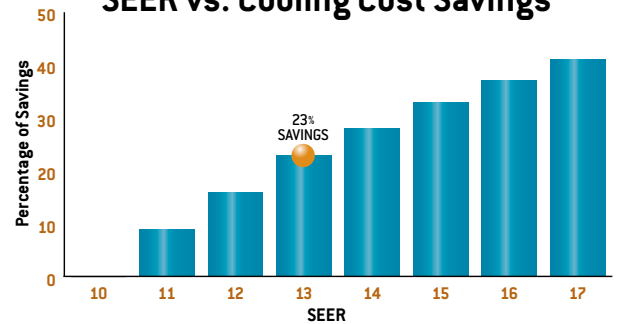

SEER[†] and HSPF[†] are industry terms for rating efficiency. At 13 SEER/7.7 HSPF, this heat pump can reduce heating and cooling bills by up to 23% compared to many older units.

[†]SEER stands for Seasonal Energy Efficiency Ratio and HSPF stands for Heating Seasonal Performance Factor.

R410A is an EPA-approved, environmentally sound refrigerant.

SEER vs. Cooling Cost Savings

Percentage based on national averages at 10 SEER; may vary according to efficiency of current unit and installation.

Four seasons of complete comfort.

Since heating and cooling systems are designed to work best together, Comfortmaker Air Conditioning & Heating strongly recommends that you have your dealer install both at the same time for optimum efficiency, savings, and comfort.

- a. **Humidifier** enhances comfort by reducing dryness in the air.
- b. **Air Cleaner** filters out many indoor air pollutants so the air in your home is cleaner.
- c. **Set-Back Thermostat** allows you to customize heating and cooling levels and also save energy.
- d. **Fan Coil** is designed to optimize airflow and improve cooling and heating efficiency.
- e. **Heat Pump** keeps your home cool in summer and warm in winter while saving on energy.
- f. **Evaporator/Indoor Coil**, to match your Comfortmaker heat pump, assures you of optimum performance.
- g. **UV Lights** help prevent the growth of microbes on the coils.

2 Durable

The painted, galvanized steel cabinet features a powder-coat, baked-on finish and a coated inlet grille with narrower spacing to provide maximum protection as it allows for proper airflow and easy coil cleaning.

4 Aerodynamic

The two-speed fan motor operates most of the time on quieter, lower speed. Aerodynamic air discharge design reduces operating sounds.

3 Efficient

The Copeland Scroll[®] compressor and the 7 mm copper tubing with aluminum fin coils work collectively to save on energy.

5 Service Friendly

The Comfort Alert[®] diagnostic system improves accuracy if the unit needs checking. The Plug & Play feature simplifies wiring and provides easy access to speed up service.

ENHANCED AIR MANAGEMENT			

[†] Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR[®] criteria. Ask your contractor for details or visit www.energystar.gov.

[‡] For information regarding furnace or fan coil options that can increase the energy efficiency of selected Comfortmaker air conditioners (SEER) and heat pumps (SEER and HSPF), go to Comfortmaker.com and look for "Energy Savings" on the menu.

[§] This Comfortmaker product carries a ten (10) year limited warranty on parts, including compressor and coils, to original homeowner if installed in an owner-occupied, single-family residence and properly registered within ninety (90) days after original installation. Otherwise, the parts warranty period is five (5) years from the date of installation. Heat exchangers may carry longer limited warranty coverage that applies to original homeowners with timely registration. (See Warranty Certificate for registration instructions. Registration not required in all jurisdictions.)

All systems tested and listed by the appropriate agencies.
